Ecomateriales y bioplásticos

Gama en crecimiento de productos sostenibles

En Polinter, S.A, trabajamos para dar respuesta a los clientes que desean un producto más sostenible y que cumpla con los objetivos de la economía circular, la estrategia para reducir tanto el consumo de materias primas como la producción de residuos. Nuestro proceso de producción nos permite ofrecer, según las necesidades del cliente, perfiles que pueden incluir materiales reciclados en diferentes porcentajes conservando sus propiedades técnicas.

Su fabricación permite también una optimización de la cantidad de materia prima utilizada, lo que incide en menor cantidad de residuos, y una eficaz gestión de ese material tanto propio como de proveedores externos.

- Para reducir el impacto ambiental, Polinter puede introducir diversos porcentajes de reciclado en función de las necesidades del cliente. También trabaja en el uso de material libre de PVC y sigue la evolución de materiales bioplásticos para su incorporación a diversas gamas si sus propiedades técnicas lo permiten.
- Polinter, S.A. ha participado en el proyecto ULTRAVISC (Sensor-based ultrasonic viscosity control for the extrusion of recycled plastics) de la Unión Europea, destinado a crear tecnología de control y vigilancia para garantizar sistemas fiables para utilizar residuos plásticos para fabricar otros productos.

Ecomaterials and bioplastics

Growing range of sustainable products

At Polinter, S.A, we work to respond to customers who want a more sustainable product that meets the objectives of the circular economy, the strategy to reduce both the consumption of raw materials and the production of waste. Our production process allows us to offer, according to customer needs, profiles that can include recycled materials in different percentages while preserving their technical properties.

Its manufacture also allows optimization of the amount of raw material used, which results in less waste, and effective management of this material, both from our own and from external suppliers.

- To reduce the environmental impact, Polinter can introduce different percentages of PVC Recycled depending on the customer's needs. It also works on the use of halogen-free material and follows the evolution of bioplastic materials for their incorporation into various ranges if their technical properties allow it.
- Polinter, S.A. has participated in the ULTRAVISC project (Sensor-based ultrasonic viscosity control for the extrusion of recycled plastics) of the European Union, aimed at creating control and surveillance technology to guarantee reliable systems for using plastic waste to manufacture other products.

Portaprecios etiqueta electrónica (ESL)
| *Electronic Shelf Label (ESL) holders*

Porta precios para etiqueta electrónica (ESL)

- Sistemas diseñados para la integración de etiqueta electrónica, compatibles con los principales formatos ESL y estándares de estantería.
- Desarrollo de soluciones a medida y adaptación de sistemas estándar.
- Estabilidad dimensional, fijación fiable y capacidad de producción para implantaciones de gran volumen.
- Desarrollo de materiales libres de PVC según requisitos técnicos.

Electronic Shelf Label (ESL) holders

- Systems designed for the integration of electronic shelf labels, compatible with the main ESL formats and shelving standards.
- Development of bespoke solutions and adaptation of standard systems.
- Dimensional stability, reliable fixing, and production capacity for large-scale rollouts.
- Development of PVC-free materials according to technical requirements.

Perfiles portaprecios

Componentes de señalización para estanterías y merchandising.

Fabricamos todo tipo de perfiles portaprecios en diferentes materiales con una amplia aplicación a los diferentes modelos estanterías del mercado. Tanto en retail como alimentación y farmacias. Con alta adaptación a los cambios de temperatura y scanners antirreflejos que permiten una eficaz redirección del haz de luz.

Nuestros perfiles tienen una gran resistencia a la acción de los rayos UV garantizando transparencia, resistencia a golpes y bajo mantenimiento. Se suministran con los complementos necesarios para su instalación en una gran variedad de soportes.

- Portaprecios planos o de bisagra, con o sin troquelado. Opciones de alambre diámetro 5 – 7 mm para combinar con DBR de 15 a 110 mm.
- Disponibles en materiales reciclados en distintas proporciones de los diferentes polímeros usados, según las necesidades de cada proyecto. Su uso permite mayor aprovechamiento de materias primas, reducción de residuos y una menor huella de carbono en el proceso de fabricación.
- Tecnologías y procesos también aplicables en materiales libres de halógenos, libres de PVC
- Posibilidad de suministro de portaprecios resistentes a altas temperaturas utilizando los materiales adecuados.

Profiles for price holders

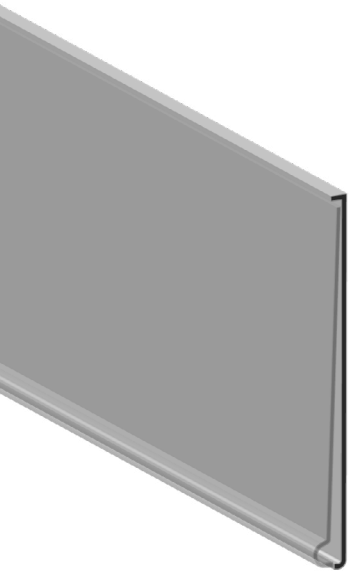

Signage components for shelves and merchandising.

We manufacture all kinds of price-holder profiles in different materials with a wide application to the different shelving models on the market. Both in retail and food and pharmacies. With high adaptation to temperature changes and anti-reflective scanners that allow effective redirection of the light beam.

Our profiles are highly resistant to the action of UV rays, guaranteeing transparency, shock resistance and low maintenance. They are supplied with the necessary accessories for installation on a wide variety of supports.

- Flat or hinged price holders, with or without punching. Wire options with a diameter of 5 – 7 mm to combine with DBR from 18 to 110 mm.
- Available in recycled materials in different proportions of the different polymers used, according to the needs of each project. Its use allows better use of raw materials, waste reduction and a lower carbon footprint in the manufacturing process.
- Technologies and processes also applicable to halogen-free materials.
- Possibility of price holders resistant to high temperatures using the appropriate materials.

Comunicación visual | Visual Merchandising

Perfiles para Comunicación Visual

Que ayudan a resaltar los elementos de merchandising.

Los perfiles plásticos para señalización y cartelería, ayudan a resaltar los elementos de comunicación visual empleados en cualquier tipo de actividad comercial y especialmente para separación de lineales de supermercado. Para cartón/nido de abeja u otros soportes gráficos como planchas de PVC.

Con alta adaptación a los cambios de temperatura y a la acción de los rayos UV garantizando transparencia, resistencia a golpes y bajo mantenimiento. Se suministran con los complementos necesarios para su instalación en una gran variedad de soportes.

- Perfiles en pinza para cartelería colgada en distintas formas con anillas plásticas disponibles. Con o sin adhesivo a doble cara y para carteles de 0,5 a 11mm de espesor.
- Disponibles en materiales reciclados en distintas proporciones de los diferentes polímeros usados, según las necesidades de cada proyecto. Su uso permite mayor aprovechamiento de materias primas, reducción de residuos y una menor huella de carbono en el proceso de fabricación.
- Tecnologías y procesos también aplicables en materiales libres de halógenos, libres de PVC

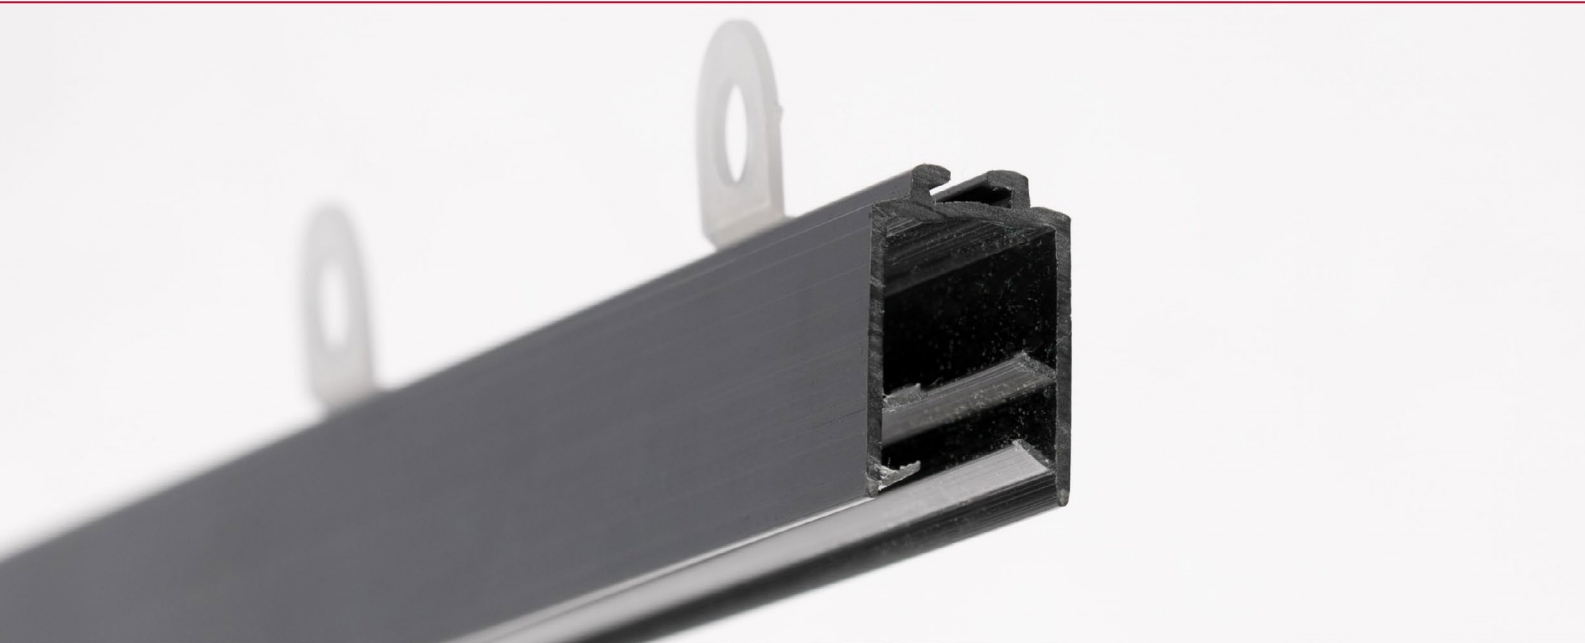

Visual Merchandising

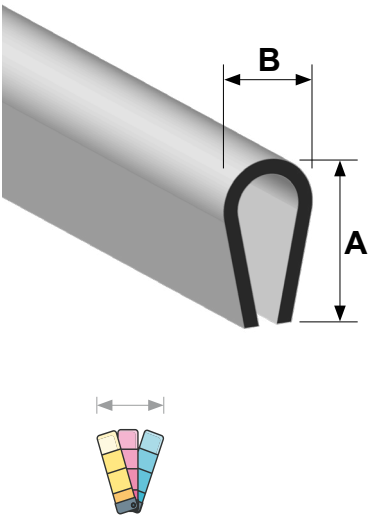

That help to highlight the elements of visual communication.

Plastic profiles for signage and billboards help to highlight the visual communication elements used in any type of commercial activity and especially for separating supermarket shelves. For cardboard/honeycomb or other graphic supports such as PVC plates.

With high adaptation to temperature changes and the action of UV rays, guaranteeing transparency, shock resistance and low maintenance. They are supplied with the necessary accessories for installation on a wide variety of supports.

- Clip profiles for hanging signage in different shapes with plastic rings available. With or without double-sided adhesive and for posters from 0.5 to 11mm thick.
- Available in recycled materials in different proportions of the different polymers used, according to the needs of each project. Its use allows better use of raw materials, waste reduction and a lower carbon footprint in the manufacturing process.
- Technologies and processes also applicable to halogen-free materials, PVC Free.

Construcción expositores | Display construction

Complementos para expositores

Perfiles, tubos, remates, componentes de iluminación para retail y alimentación

Diferentes soluciones para complementar la oferta de fabricantes de expositores. Disponemos y desarrollamos una amplio espectro de productos para la instalación de expositores para retail, alimentación y lineales de supermercados.

Perfiles, molduras, tubos, remates, componentes de iluminación. Disponemos de un amplio rango de acabados para mueble, complementos de iluminación. Desarrollos a medida con plazos ajustados.

- El proceso de foliado amplía las opciones de decoración de nuestros perfiles con madera natural, telas y metalizados.
- Disponibles en materiales reciclados en distintas proporciones de los diferentes polímeros usados, según las necesidades de cada proyecto. Su uso permite mayor aprovechamiento de materias primas, reducción de residuos y una menor huella de carbono en el proceso de fabricación.
- Tecnologías y procesos también aplicables en materiales libres de halógenos, libres de PVC.

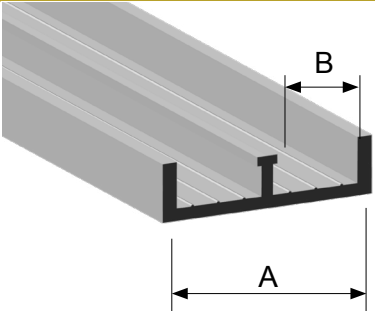

Display accessories. Complements for exhibitors

Profiles, tubes, finishes, lighting components for retail and food

Different solutions to complement the offer of display manufacturers. We have and develop a wide spectrum of products for the installation of displays for retail, food and supermarket lines.

Profiles, moldings, tubes, finishes, lighting components. We have a wide range of finishes for furniture, lighting accessories. Custom developments with tight deadlines.

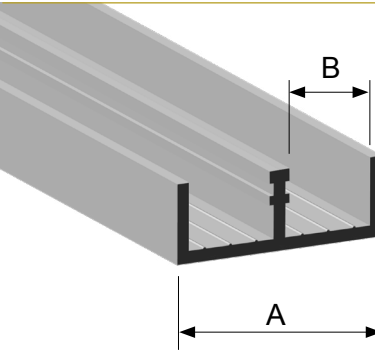

- The foliate process expands the decoration options of our profiles with natural wood, fabrics and metallics.
- Available in recycled materials in different proportions of the different polymers used, according to the needs of each project. Its use allows better use of raw materials, waste reduction and a lower carbon footprint in the manufacturing process.
- Technologies and processes also applicable to halogen-free materials, PVC Free.

Complementos para decoración comercial

Amplia gama de perfiles y elementos para la decoración de tiendas.

Amplia gama de perfiles, molduras y complementos para la decoración de tiendas y locales comerciales con desarrollo de productos a medida con elementos estructurales y perfiles con diferentes acabados.

Distintas tecnologías de acabados tanto foliados como vinilo. Foliado con imitación de distintos materiales o texturas. Decorados con madera y acabado metalizados.

- Complemento perfecto para la gama de productos para la fabricación de expositores que incluyen perfiles, tubos, remates y componentes de iluminación.
- Para expositores de vida limitada en retail y alimentación. Los perfiles decorativos en distintas tecnologías para falsos techos en centros comerciales y zócalos como elementos de protección se desarrollan a medida con plazos ajustados.
- Tecnologías y procesos también aplicables en materiales libres de halógenos, libres de PVC.

Complements for commercial decoration

Wide range of profiles and elements for store decoration.

Wide range of profiles, moldings and accessories for decorating shops and commercial premises with the development of customized products with structural elements and profiles with different finishes.

Different finishing technologies, both foliated and vinyl. Foliated with imitation of different materials or textures. Decorated with wood and metallic finish.

- Perfect complement to the range of products for the manufacture of displays that include profiles, tubes, finials and lighting components.
- For limited-life displays in retail and food. Decorative profiles in different technologies for false ceilings in shopping centers and baseboards as protection elements are developed to measure with tight deadlines.
- Technologies and processes also applicable to halogen-free materials, PVC Free.
